# BOUNDLESS
AUTOMATION

An advanced automation solution designed to simplify, automate and streamline Network Operations. Boundless Automation helps MSPs and enterprises gain efficiency, increase agility, and optimize costs.

POWERED BY ·il·il· CISCO Meraki

Accelerate your NetOps
WITH ENTERPRISE-GRADE AUTOMATION

By using Meraki APIs, the Boundless off-the-shelf platform fully integrates with any Meraki network infrastructure to automate the configuration, provisioning, and management processes.

Network Provisioning

Automate your network provisioning and turn a slow and error-prone process into a quick and effortless tasks.

Configuration Tasks

Deploy new, updated, or cloned configurations more quickly, simultaneously and at a large scale.

Management Operations

Accelerate your auditing and monitoring steps, allowing you to troubleshoot faster.

Do you think that automation isn't something you need?
TAKE A LOOK AT WHAT YOU ARE MISSING

50x
FASTER PROVISIONING

Deploying thousands of networks manually usually takes hours.
With Boundless Automation you can get it done automatically in a matter of minutes, saving a great amount of hours and reducing the risk of manual errors.

DEPLOY
100 SITES

MANUALLY	WITH BOUNDLESS
8 hours	**3** minutes

MONITOR
500 SITES

MANUALLY	WITH BOUNDLESS
45 minutes	**10** seconds

10x
LOWER MTTI

Identifying an issue and locating the client source in organizations with over 500 networks can be a quite time-consuming and tedious task. Boundless Automation accelerates this process to just seconds, consequently improving the overall MTTR.

40%
REDUCTION ON MANUAL OPERATIONS

Let's say you have to run bulk config changes on dozens of sites simultaneously, setup external guest WiFi services on a hundred sites, and audit configuration settings on all your networks.
Accomplishing all these tasks could easily take your team a full working day. But using Boundless Automation it would just take you a few minutes.
As a result, you'll accelerate your NetOps and free up your teams for more strategic tasks.

AUDIT CONFIG SETTINGS
ON 60 SITES

MANUALLY	WITH BOUNDLESS
4 hours	**1** minute
