The Advanced Captive Portal Solution
for Hospitality

BOUNDLESS
DIGITAL

GET MORE VALUE FROM YOUR
GUEST WIFI

When it comes to hotels, bars, restaurants, or coffee shops, Guest WiFi can open a myriad of business opportunities. Providing WiFi as-a-service is a great way to engage with your customers, deliver a best-in-class onsite experience, and enhance customer loyalty over time.

The Boundless Guest captive portal solution helps hospitality business achieve all that, in all simplicity.

Welcome the next generation of
CAPTIVE PORTALS

Enhance the Guest WiFi experience

- Enable seamless login access by selecting the most suitable sign-on method: social login, guest form, ticketing, and more.
- Build attractive Splash Pages and customize them with your own branding by using the intuitive drag and drop page builder.
- Avoid bandwidth saturation by easily managing the total upload and download bandwidth per user.
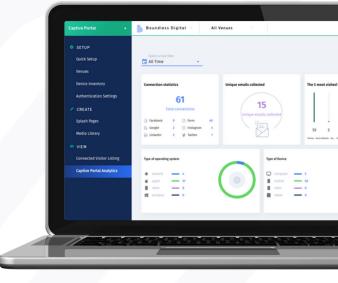

Collect user key analytics

- Collect customer insights based on behavior and gain visibility into customer engagement.
- Use social login to better define and segment your customer profile.
- Store your data in compliance with the GDPR regulations.

Open new marketing opportunities

- Use your Splash and forwarding page as a media channel. Use them to advertise your latest offers, talk about your future events, etc.
- Increase your social media followers, app downloads, or website traffic by customizing the forwarding URL based on the device type, or sign-on method your customer used to connect to WiFi.
- Use the collected customer data to nurture your marketing strategy, and drive more personalized campaigns.
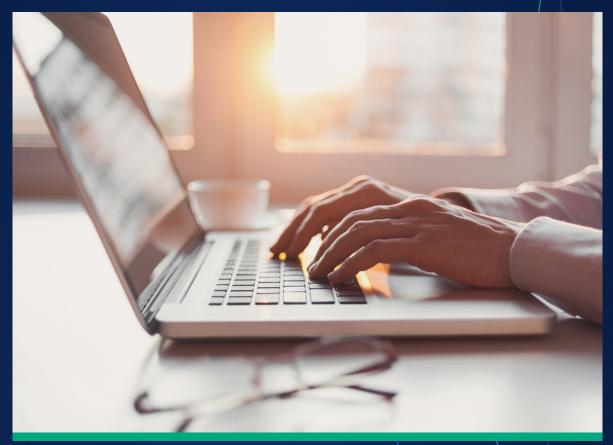

Secure your Guest WiFi

- Protect your Guest WiFi by easily applying web filters to control the content that user can access from your network.
- Aggregate and preserve traffic-related activity logs from your WiFi, in compliance with the GDPR.
- Determine when users can access your Guest WiFi, and even add-in break periods.

Boundless Guest seamlessly integrates multiple technological vendors, such as Cisco Meraki, Aruba, Extreme, Zyxel, Huawei, Ubiquity, Ruckus, and more.
