

# BOUNDLESS GUEST

The Advanced Captive Portal Solution  
*for Public Spaces*

# GET MORE SIMPLICITY AND SECURITY FROM YOUR **GUEST WIFI**

Connectivity today is not only a commodity but also a necessity. This is why more and more public administrations worldwide have made it their priority to provide free WiFi access in public spaces.

To ensure a successful public WiFi implementation, these administrations will require to have a reliable captive portal solution that is fast to deploy, easy to manage, and that offers high level security and seamless login access. Exactly what Boundless Guest provides.

## Discover the next generation of **CAPTIVE PORTALS**

### **Simplified Deployment**

Rapid deployment, with no need for software or hardware installation.

### **Intuitive Management**

Streamlined workflows, easy-to-use dashboard interface.

### **Centralized Platform**

Facilitate and speed up the administration of multiple networks.

### **Role-based Access Control**

Encourage collaboration with role-based access control.

### **Data Security Compliance**

Data collection and storage in compliance with the GDPR and CNIL.

### **Scalable Technology**

Cloud-based infrastructure to overcome hardware limitations.

## Advanced Captive Portal

- Embedded and fully customizable Splash Page builder.
- Extensive offer of sign-on authentication methods, including Guest Form, SMS or Social login.
- Multilingual captive portal technology
- User recognition within 12 hours following last access

## Flexible WiFi QoS parameters

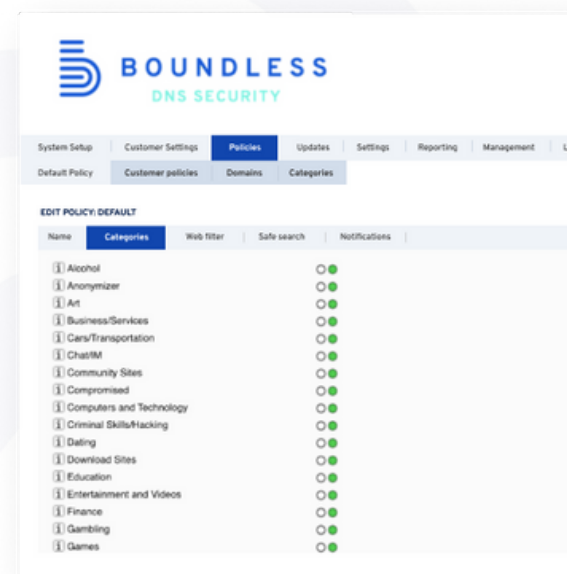

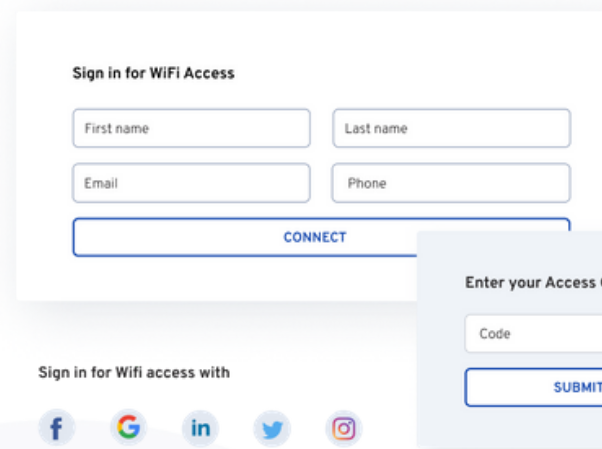

- Avoid bandwidth saturation by easily managing the total upload and download bandwidth per user
- Define a maximum connection time, in all simplicity and with wide flexibility
- Determine when users can access your Guest WiFi, and even add-in break periods

## WiFi security and log storage

- Protect your Guest WiFi by easily applying web filters to control the content that user can access from your network
- Host your captive portal on a secured HTTPS server
- Aggregate and preserve traffic-related activity logs from your WiFi in compliance with the GDPR.

## Simplified administration

- Seamless integration and deployment of multi-site networks
- Cloud-based technology that enables remote network management and configuration.
- Real-time network monitoring through a centralized and intuitive dashboard

**Boundless Guest is compliant with the Wifi4EU requirements and seamlessly integrates multiple technological vendors, such as Cisco Meraki, Aruba, Extreme, Zyxel, Huawei, Ubiquity, or Ruckus.**
