efficient and
profitable as your
Cisco Meraki
infrastructure
grows and scales.**

BOUNDLESS AUTOMATION SCALE YOUR MERAKEI OPERATIONS WITH SHOCKING EASE

Boundless Automation streamlines the management of Cisco Meraki organizations at scale.

Large configuration changes done within minutes

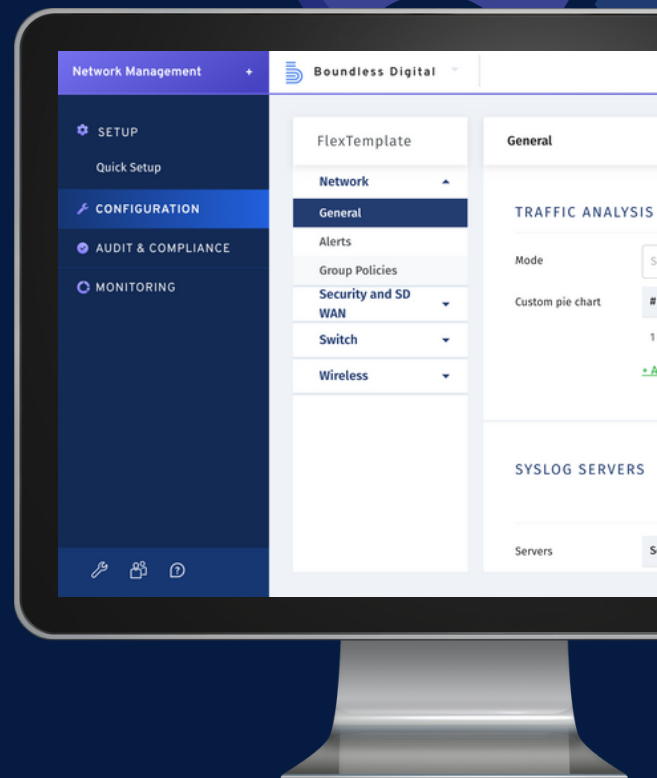

- Deploy custom changes to many networks in bulk with no dependence on the Meraki templates

Standardizing your networks is now an easy task

- Define your own compliance rules and quickly audit any network parameter against them
- Ensure the complete standardization of your network names, tags, and configuration settings

Scale your networks without putting any extra effort

- Search and monitor all devices connected to your organization from one single screen
- Move devices across networks without losing its configuration

The flexibility to manage YOUR networks YOUR way.

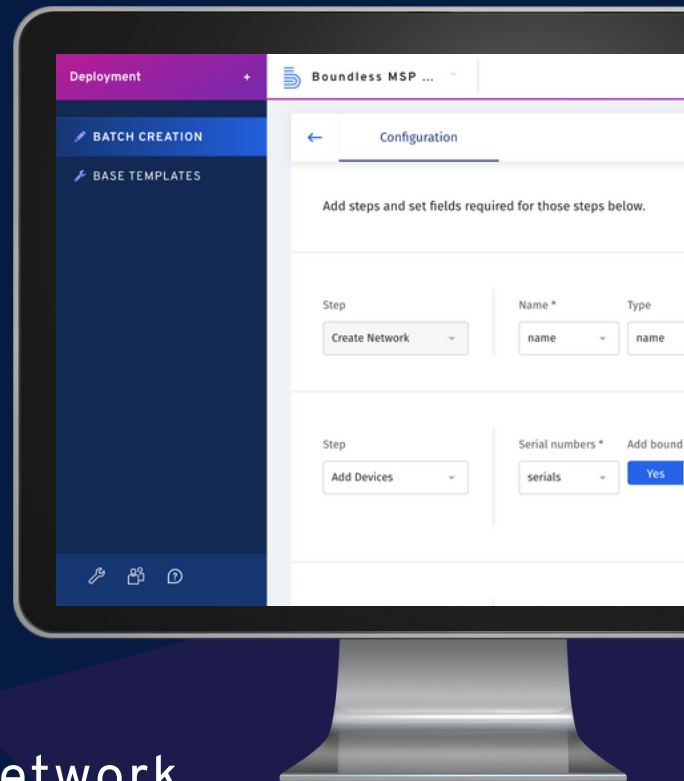

BOUNDLESS DEPLOYMENT

DEPLOY NETWORKS ON RECORD TIME

Boundless Deployment creates and provisions hundreds of Meraki networks automatically, and at scale.

Cut down on time and errors when deploying new networks

- Create a massive number of networks with minimum effort, just by using a CSV file
- Select a pre-built provisioning workflow, or easily design your own one
- Launch your process and configure your networks within minutes instead of hours

Simplify and accelerate your network deployments with minimum manpower

- Improve the efficiency of your Operations Team
- Reduce workload and maximize service margins

**Provisioning over 200 networks in under 5 minutes?
Yes. It is possible.**

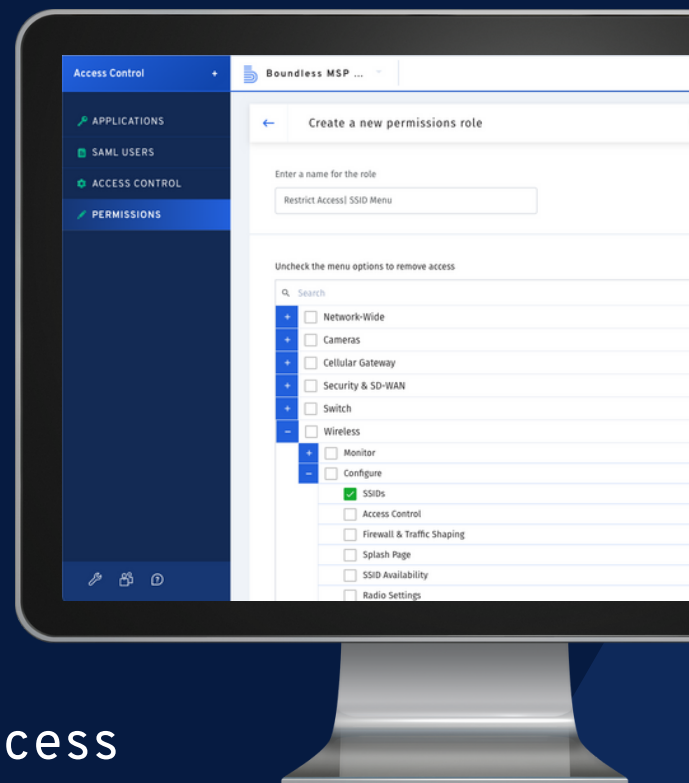

BOUNDLESS ACCESS CONTROL

TAKE CONTROL OF YOUR MERAKI USER BASE

Boundless Access Control is the most advanced access management solution designed for Meraki organizations.

Increase efficiency Get rid of the grunt work

- Get dynamic visibility over your entire user base and across all your organizations, in a single pane of glass
- Create and delete users from hundreds of organizations in under a minute
- Edit access privileges for dozens of users in bulk

Enable granular dashboard access Keep your peace of mind

- Granularly control user access to the Meraki dashboard
- Select which features or menus each user has access to, on an individual basis
- Minimize the chances of unwanted configuration changes and errors

Save up to 90% of time managing Meraki's user base.

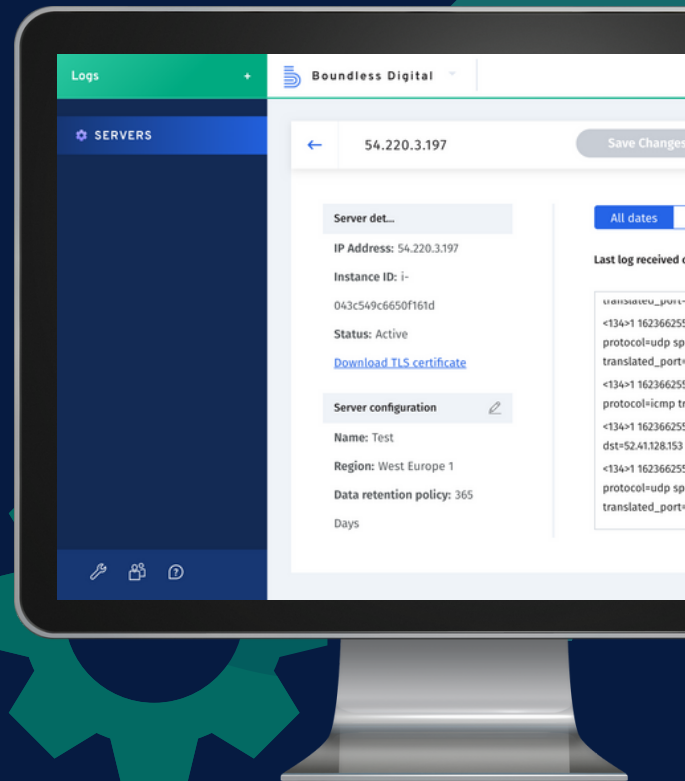

BOUNDLESS LOGS

ACCELERATE TROUBLESHOOTING

Boundless Logs is a cloud-based syslog management tool that helps IT teams monitor, record and analyze what goes on in their systems.

Get the data you need, how and when you need it

- Easily collect, store, and view the syslog data coming from your Meraki infrastructure
- Visualize your network logs in near real-time
- Choose the most convenient data retention policy, from 7 to 365 days
- Seamlessly scale your log server volume as your network grows

Set it up a server in seconds, learn how to use it in minutes

- Connect your newly created log server to Meraki automatically, through the API
- Extremely short learning curve. No need for long training hours or boring documentation

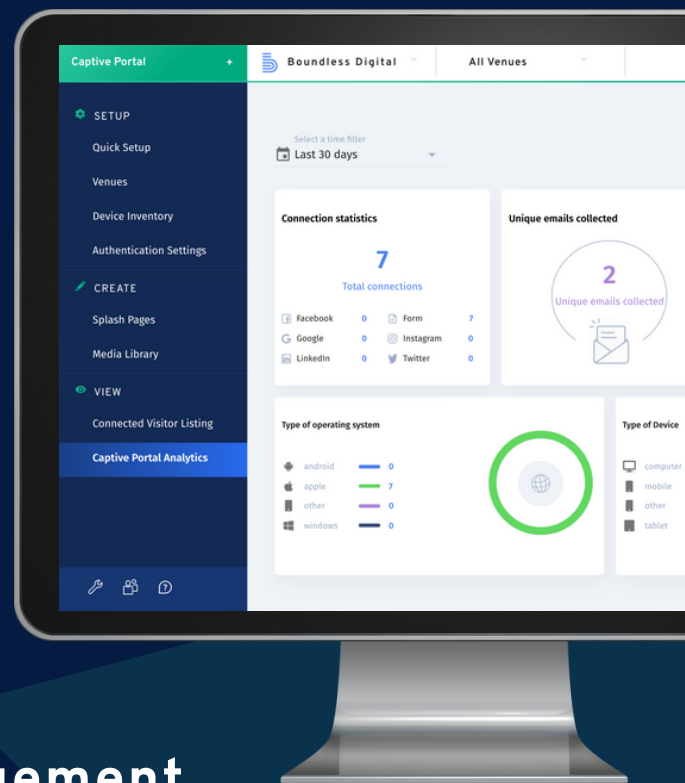

**Get deeper visibility on your network performance.
Quickly find the needle in the haystack.**

BOUNDLESS GUEST GET MORE VALUE FROM YOUR GUEST WIFI ACCESS

Boundless Guest offers an advanced captive portal tool and highly demanded features to generate business value from Guest WiFi.

Enhance your Guest WiFi experience

- Customize and deploy your Splash Pages using the drag and drop builder
- Choose from a wide variety of login methods: social login, ticketing, ambassador, email and SMS, and more
- Nurish your marketing efforts with qualified leads, and track traffic performance through an intuitive analytics dashboard

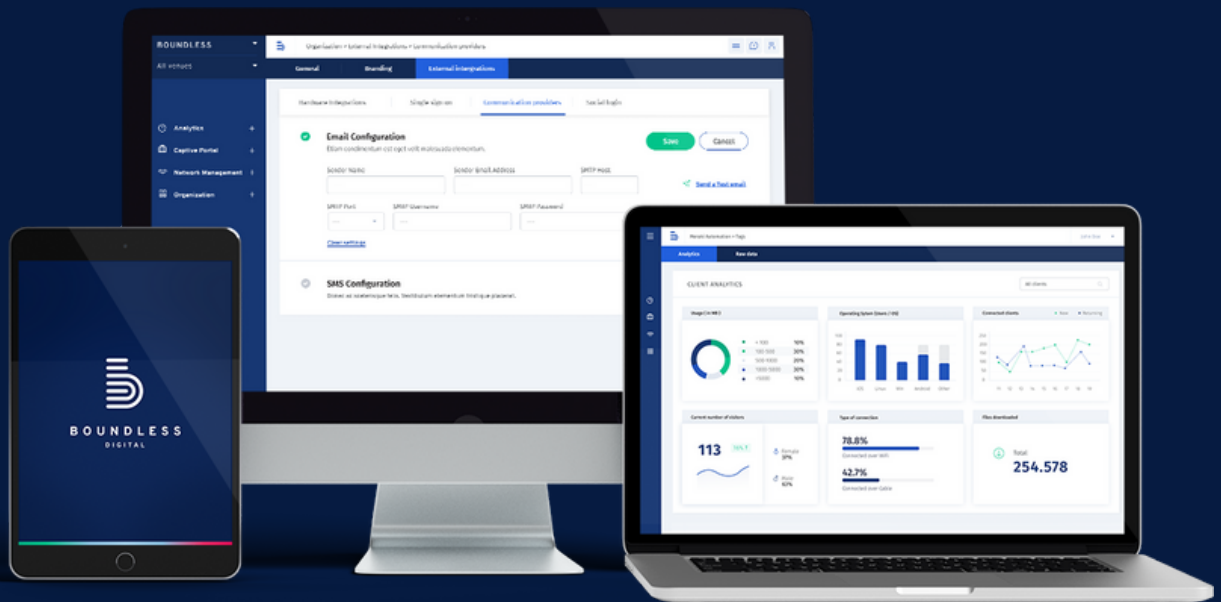

Benefit from a simpler management and a more advanced control

- Get started in less than 60 seconds by simply using your Meraki API key
- Automatically configure the radius, walled garden, redirections, and the syslog servers
- Enforce web content filtering rules, and store traffic logs in compliance with regulations

Explore the next generation of captive portal solutions.

THE MISSING PIECE TO YOUR CISCO MERAKI STACK

The Boundless solutions make your work **faster**,
your days **easier**, your life **better**.
