BOUNDLESS
GUEST SECURITY

Unparalleled DNS-filtering protection
for your Business Guest WiFi
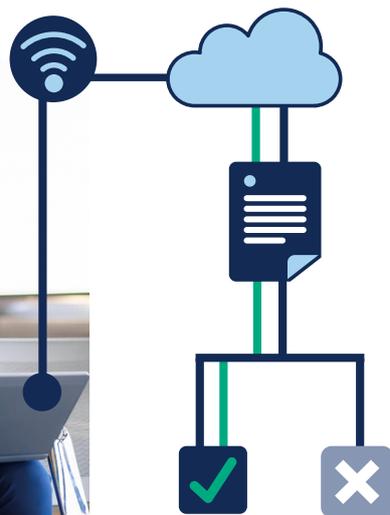

BOUNDLESS
DIGITAL

Offering public or Guest WiFi service brings a responsibility with it:
to protect your users from inappropriate content and malicious sites.

When a business Guest WiFi service fails to provide high-level protection, it not only compromises the security of their users' devices and data, but also puts the network itself at risk.

DNS-LEVEL PROTECTION AGAINST ONLINE THREATS

By enforcing web-content filtering at the domain level, Boundless Guest Security blocks malicious domains before a connection is even established.
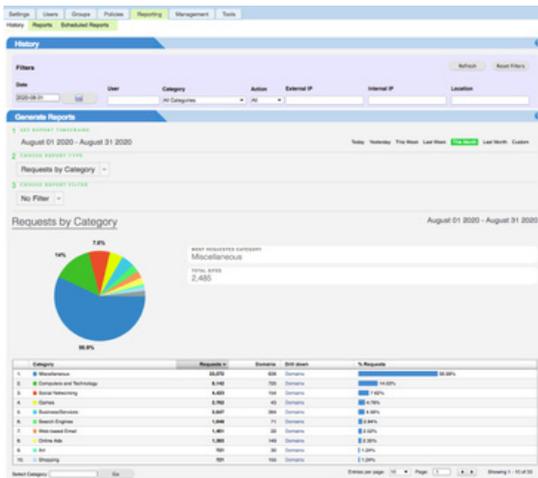

Boundless Guest Security advanced web-content filtering solution instantaneously checks all website requests made through your Guest WiFi network.

By comparing each DNS request against a global threat database, Boundless Guest Security can decide what website allow or block based on your business' predefined policies.
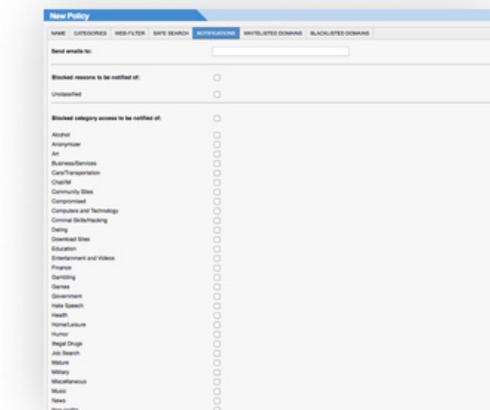

As a result, not only you provide a safer WiFi environment to your users, but also fortify your network protection.

Provide a
SAFER GUEST WIFI ENVIRONMENT

Easy to deploy and manage

The solution can be setup in a matter of minutes, with no need for software or hardware installation.
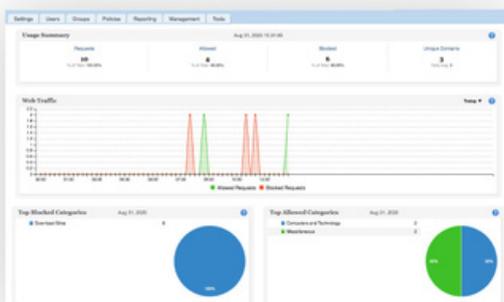

Real-time malware protection

Protect your network from phishing and malware attacks by blocking access to compromised websites, spyware and other malicious sites.

Unparalleled URL filtering

Real-time website URL categorization into 53 predefined categories, such as gambling, pornography, or hate speech.

More visibility, better control

Monitor the DNS activity of your network in real-time and get access to a full suite of predefined reports on user or group activity.

The perfect complement to your
BOUNDLESS GUEST SOLUTION

Intuitive Management

Streamlined workflows, and easy-to-use dashboard interface.

High Simplicity

Use your existing WiFi networks. No need for software or hardware installation.

Granular Categorization

53 different website category options and customizable categories.

Customizable Policies

Easily create and manage your own policy to protect individuals or user groups.

Fast Response

Cloud-based infrastructure that overcomes hardware limitations.

Flexible Pricing

Affordable and flexible licensing model adapted to all organizations.
